## Professional Summary

5 Years	<b>Product Designer</b> I am directing the design of 2 different projects in the defense industry sector. I also had the opportunity to work on more than seven product designs.
5 Years	<b>UX/UI Designer</b> I worked throughout this process in both mobile and web domains.
1 Year	<b>Industrial Designer</b> During this time, I designed and played a role in the production of special parts in a construction company.

## Work Experience

2023- 2022-2023	<b>OBSS</b> <b>Senior Product Designer</b> <b>Product Designer</b> I work within the scope of ASELSAN projects. During this process, I guide the designs. I contribute the experience processes, new features and user flows of the designs, as well as motion design for interactions and prototyping. In addition, I provide UI and visual features for UI library.
2020-2022	<b>Hotech Software</b> <b>UX-UI Designer</b> Throughout my life at Hotech, I have been involved in both mobile and web projects. I worked for 6 different products. I took part in the user experience, interaction design, visual design and prototyping processes of these projects.
2020	<b>CY</b> <b>Product Designer</b> I took part in the design of the user experience and UI elements of the products. As a part of the team, I worked to define visual design language. I created wireframes, user flows and contributed to the visual design of products. I helped prototype and define the Interaction.
2019 - 2020	<b>Tacer İnşaat</b> <b>Product Design and Management</b> I worked as an industrial designer at Tacer. It was my responsibility to design, develop and production of the products. I contributed in the process management of the projects. I took part in the process of the designed and produced product until it reached the customer.
